No. Global address list is not an option anymore. We can't have outside organization email address in it.

To use the shared address list go into your contacts. On the left hand pane you should see "shared Contacts" and the lists I shared with you. Select the Gold King Master List and then click the email icon. This is the only way I could find to share one list and be able to keep it updated.

This seemed to work remotely....I was able to open it. Will this come up in the global address book or do we need to save it somehow?
